Vational Union Republican Con-vention. The understaned, constituting the National committee designated by the Convention held at lineage on the 20th of May, 1868, hereby cail a Convention of the Un'on Republican party at the ty of Philadelphia, on Wednesday, the 5th day of June next, at tweive o'clock, noon, for the purpose of nominating candidates for the offices of resident and Vice President of the United states.

In calling this Convention, the Committee remind the country that the promises of the Unin Republican Convention of 1885 have been tailfilled. The States lately in rebellion have been restored to their former relations to the Government. The laws of the country have been faithfully executed, public faith has been preserved and the national ciedit firmly established. Government economy has been illustrated by the reduction, at the same time, of the public destand of taxation; and the tunding of the pathic destand of taxation; and the tunding of the national debt at a lower rate of interest has been successfully inaugurated. The rights and immigration ene lunged by liberal provisions. The detenders of the Union have been grate unly remembered and the rights and interests of labor recognized. Laws have been enseted, and are ecogoized. Laws have been enacted, and eing enforced, for the prot ction of person roperly in all sections. Equal acts age has agrafted on the National Constitution the

of peace throughout the world, while the national noner has been maintained. Corruption has been exposed, offenders purished, responsibility enforced, safeguards established, read now, as heretofore, the Republican party stands pledged to correct all abuses and carry out all reforms necessary to maint in the pury and efficiency of the public service. To continue and firmly establish its fundamental principles, we invite the co-peration of all the citizens of the United

Oil Well Tubing.

This Superior Tubing is furnished with heavy sockets, and is out with a vanishing screw thread, corresponding exactly with the thread in the socket, so that when screwed up it has a bearing the whois length of the joint; and the absence of a deep thread on the tube at the and of the mocket obviates the liability to break as that point from the orbital caused by the action of the pump.

Each length and socket is stamped with our brade mark, and is carrefully tosted before shipment with a hydraulic pressure of 1,300 pounds is the square leah. W. G. ALLISON & SONS Junto NEWSPAPERARCHIVE®
